

NEW PRODUCTS GUIDANCE

G24 H12

Cutter for Shoulder Milling

Sumi Dual Mill Series
DFC Type

The Sumi Dual Mill DFC type is designed for performance reliability and has a wide milling cutter range to cover various applications. This cutter type employs cost effective double-sided inserts for high toughness and enhanced accuracy.

Radius Cutter for Exotic Alloys

Wave Radius Mill
RSX Series

Achieving stable machining by suppressing vibrations and chattering during helical milling and ramping of exotic alloys, with a high-raked cutting edge design that reduces cutting resistance.
